# JOURNAL OF ELECTROANALYTICAL CHEMISTRY AND INTERFACIAL ELECTROCHEMISTRY, VOLUME 246 (1988)

## SUBJECT INDEX

Acetylacetone,
ion–solvent interactions in ———. Part III. Gibbs energies of transfer of the chloride ion and its complex formation constants with other solvents (Sakamoto et al.) 207
Acid corrosion,
inhibition of the ——— of steel by 4-amino-3-hydrazino-5-thio-1,2,4-triazoles (Tadros, Abd-El-Nabey) 433
Adriamycin,
electrocatalytic reduction of oxygen at a pyrolytic graphite electrode modified by ——— and its 7-deoxyaglycone (Konse et al.) 385
Amalgam,
——— voltammetric approach to heavy metal speciation in natural waters. Part I. Theoretical aspects and methodology (K.H. Schrøder) 15
4-Amino-3-hydrazine-5-thio-1,2,4-triazoles,
inhibition of the acid corrosion of steel by ——— (Tadros, Abd-El-Nabey) 433
Ammonia,
in situ modification of the energetic structure of the n-GaP/——— junction in the presence of solvated electrons (Guyomard et al.) 29
Amylase,
amperometric determination of total ——— (Batchelor) 307
Anodic stripping voltammetry,
——— at ultramicroelectrodes for metal speciation studies in aqueous solutions of low ionic strength (Wang, Zadeii) 297
Auger electron spectroscopy,
——— depth profiling of electrochemically grown γ-FeOOH (Ardizzone, Formaro) 53

Binary electrolyte solutions,
on the theory of ionic adsorption from ——— at electrodes (Damaskin et al.) 247

Carbazoles,
synthesis and properties of film electrodes from *N*-substituted ——— in acid medium (Cattarin et al.) 87
Carbon,
the zeolite-modified ——— paste electrode (El Murr et al.) 459
Chloride,
ion–solvent interactions in acetylacetone. Part III. Gibbs energies of transfer of the ——— ion and its complex formation constants with other solvents (Sakamoto et al.) 207
Chronocoulometric relaxations,
effects of quasi-reversible charge transfer on ——— in linearly adsorbing systems (Reinmuth, Balasubramanian) 233
Effects of quasi-reversible charge transfer on ——— in non-linearly adsorbing systems (Reinmuth) 241
Cobalt,
research on chemically modified electrodes. Catalytic reduction of dioxygen at a ——— phthalocyanine-doped polyaniline film electrode (Jiang, Dong) 101
Copolymeric structures,
electropolymerized multilayer and ——— based on substituted pyrroles (Downard et al.) 321
Copper,
reduction of the cell voltage in ——— electrowinning by using the methanol BFE anode (Watanabe et al.) 313
Cupric ions,
study of the platinum/electrolyte interface using surface plasmon excitation at stratified electrodes. Part II. Optical behaviour of $Pt/H_2SO_4$ + ——— systems (Tadjeddine, Hadjadj) 43
β-Cyclodextrin,
adsorption of ——— on a dropping mercury

electrode from aqueous solutions (Borkowska) 423

7-Deoxyaglycone,
electrocatalytic reduction of oxygen at a pyrolytic graphite electrode modified by adriamycin and its ——— (Konse et al.) 385

3,5-Dicyano-1,2,4,6-tetramethylpyridinium,
electrochemical synthesis and reactivity of ——— (Largeron, Fleury) 373

Dioxygen,
electrocatalysis of ——— reduction to water in different acid media by iron naphthalocyanines (Coowar et al.) 119
Redox and electrocatalytic properties towards ——— reduction of ruthenium tetra(*ortho*-aminophenyl)porphyrin complexes with various axial ligands (Bettelheim et al.) 139
Research on chemically modified electrodes. Catalytic reduction of ——— at a cobalt phthalocyanine-doped polyaniline film electrode (Jiang, Dong) 101

Ethanol,
on the adsorption and oxidation of ——— on platinum as studied with in-situ IR spectroscopy (Holze) 449

Ferrocyanide,
electrochemical and FTIR spectroscopic characterization of ———-modified $TiO_2$ electrodes designed for efficient photosensitization (Desilvestro et al.) 411

Ferrous/ferric ions,
effects of solution pH on the voltammetric behaviour of ——— at zeolite-modified electrodes (Iwakura et al.) 63

Free radicals,
redox catalysis allied with spin trapping. An efficient way for characterization of ——— formed at very negative potentials (Djeghidjegh et al.) 455

*n*-Gallium phosphide
in situ modification of the energetic structure of the ———/$NH_3$ junction in the presence of solvated electrons (Guyomard et al.) 29

Geometrically uneven electrodes,
voltammetry at ———. Part I. Chronoamperometry at model electrodes with rectangular hollow or protrusive surfaces (Tanaka et al.) 1

Glucose,
electrocatalytic oxidation of ——— at platinum in alkaline medium: on the role of temperature (Essis Yei et al.) 349

Gold,
incorporation of *N*-octadecyl-4-pyridinium-4′-pyridyl bromide or *N*-octadecyl-4,4′-bipyridinium dibromide into self-assembled hexadecylmercaptan monolayers on ——— electrodes (Bunding Lee et al.) 231

Group 2a cations,
electrochemical investigation of the interaction between the superoxide ion and ——— in aqueous solutions (Argese et al.) 155

Heavy metal speciation,
amalgam voltammetric approach to ——— in natural waters. Part I. Theoretical aspects and methodology (K.H. Schrøder) 15

Hexadecylmercaptan,
incorporation of *N*-octadecyl-4-pyridinium-4′-pyridyl bromide or *N*-octadecyl-4,4′-bipyridinium dibromide into self-assembled ——— monolayers on gold electrodes (Bunding Lee et al.) 231

Ionic adsorption,
on the theory of ——— from binary electrolyte solutions at electrodes (Damaskin et al.) 247

Ion–solvent interactions,
——— in acetylacetone. Part III. Gibbs energies of transfer of the chloride ion and its complex formation constants with other solvents (Sakamoto et al.) 207

Iron,
electrocatalysis of $O_2$ reduction to water in different acid media by ——— naphthalocyanines (Coowar et al.) 119

γ-Iron oxohydroxide,
AES depth profiling of electrochemically grown ——— (Ardizzone, Formaro) 53

Isoporphyrin,
——— formation upon electrochemical oxidation of zinc tetrakis(4-sulfonato-phenyl)porphine in aqueous solution (Su et al.) 363

β-Ketones,
linear relationships between ligand composition and reversible half-wave potentials of Ru(III) and Ru(II) complexes with two kinds of ——— (Hoshino et al.) 225

Linearly adsorbing systems,
effects of quasi-reversible charge transfer on chronocoulometric relaxations in ——— (Reinmuth, Balasubramanian) 233

Mercury,
adsorption of β-cyclodextrin on a dropping ——— electrode from aqueous solutions (Borkowska) 423
Deposition and electrochemical stripping of ——— ions on polypyrrole based modified electrodes (Imisides, Wallace) 181
Non-conventional normal pulse polarographic techniques with a static ——— electrode for applications at very low reactant concentrations (Carla′ et al.) 283
Metal speciation,
anodic stripping voltammetry at ultramicroelectrodes for ——— studies in aqueous solutions of low ionic strength (Wang, Zadeii) 297
Methanol BFE anode,
reduction of the cell voltage in copper electrowinning by using the ——— (Watanabe et al.) 313
Multilayer structures,
electropolymerized ——— and copolymeric structures based on substituted pyrroles (Downard et al.) 321

Naphthalocyanines,
electrocatalysis of $O_2$ reduction to water in different acid media by iron ——— (Coowar et al.) 119
2-Nitrophenylhydrazones,
influence of water on the electroreduction of ——— in acetonitrile (Pazdera et al.) 399
Non-linearly adsorbing systems,
effects of quasi-reversible charge transfer on chronocoulometric relaxations in ——— (Reinmuth) 241
Normal pulse polarography,
non-conventional normal pulse polarographic techniques with a static mercury electrode for applications at very low reactant concentrations (Carla′ et al.) 283

*N*-Octadecyl-4,4′-bipyridinium dibromide,
incorporation of *N*-octadecyl-4-pyridinium-4′-pyridyl bromide or ——— into self-assembled hexadecylmercaptan monolayers on gold electrodes (Bunding Lee et al.) 231
*N*-Octadecyl-4-pyridinium-4′-pyridyl bromide,
incorporation of ——— or *N*-octadecyl-4,4′-bipyridinium dibromide into self-assembled hexadecylmercaptan monolayers on gold electrodes (Bunding Lee et al.) 231
Oxygen,
competitive electroformation of silver and ——— overlayers on polycrystalline rhodium in acid (Parajón Costa et al.) 441
Electrocatalytic reduction of ——— at a pyrolytic graphite electrode modified by adriamycin and its 7-deoxyaglycone (Konse et al.) 385

Palladium,
modifications of ——— electrode surfaces produced by periodic potential treatments (Perdriel et al.) 165
Phthalocyanine,
research on chemically modified electrodes. Catalytic reduction of dioxygen at a cobalt ———-doped polyaniline film electrode (Jiang, Dong) 101
Platinum,
cathodic electropolymerization of polythiophene on ——— and various semiconducting electrodes (Xu et al.) 465
Characterization of sulfur layers from reduced sulfur dioxide on porous ——— black/teflon electrodes (Foral, Langer) 193
Electrocatalytic oxidation of glucose at ——— in alkaline medium: on the role of temperature (Essis Yei et al.) 349
On the adsorption and oxidation of ethanol on ——— as studied with in-situ IR spectroscopy (Holze) 449
Study of the ———/electrolyte interface using surface plasmon excitation at stratified electrodes. Part II. Optical behaviour of $Pt/H_2SO_4$ and $Pt/H_2SO_4 + Cu^{2+}$ systems (Tadjeddine, Hadjadj) 43
Polyaniline,
research on chemically modified electrodes. Catalytic reduction of dioxygen at a cobalt phthalocyanine-doped ——— film electrode (Jiang, Dong) 101
Polycarbazole,
electrochemical synthesis and properties of ——— films in protic acid media (Mengoli et al.) 73
Polypyrrole,
deposition and electrochemical stripping of ions on ——— based modified electrodes (Imisides, Wallace) 181

Polythiophene,
cathodic electropolymerization of ——— on platinum and various semiconducting electrodes (Xu et al.) 465
Pyrolytic graphite,
electrocatalytic reduction of oxygen at a ——— electrode modified by adriamycin and its 7-deoxyaglycone (Konse et al.) 385
Pyrroles,
electropolymerized multilayer and copolymeric structures based on substituted ——— (Downard et al.) 321

Quasi-reversible charge transfer,
effects of ——— on chronocoulometric relaxations in linearly adsorbing systems (Reinmuth, Balasubramanian) 233
Effects of ——— on chronocoulometric relaxations in non-linearly adsorbing systems (Reinmuth) 241

Rhodium,
competitive electroformation of silver and oxygen overlayers on polycrystalline ——— in acid (Parajón Costa et al.) 441
Ruthenium,
linear relationships between ligand composition and reversible half-wave potentials of ———(III) and Ru(II) complexes with two kinds of $\beta$-ketones (Hoshino et al.) 225
Ruthenium tetra(*ortho*-aminophenyl)porphyrin,
redox and electrocatalytic properties towards dioxygen reduction of ——— complexes with various axial ligands (Bettelheim et al.) 139

Silver,
competitive electroformation of ——— and oxygen overlayers on polycrystalline rhodium in acid (Parajón Costa et al.) 441
Solvated electrons,
in situ modification of the energetic structure of the n-GaP/$NH_3$ junction in the presence of ——— (Guyomard et al.) 29
Spin trapping,
redox catalysis allied with ———. An efficient way for characterization of free radicals formed at very negative potentials (Djeghidjegh et al.) 455
Stability constants,
on the influence of adsorption of electroactive species on the polarographic determination of ——— (Montemayor, Fatas) 271
Steel,
inhibition of the acid corrosion of ——— by 4-amino-3-hydrazino-5-thio-1,2,4-triazoles (Tadros, Abd-El-Nabey) 433
Sulphur,
characterization of ——— layers from reduced sulfur dioxide on porous platinum black/teflon electrodes (Foral, Langer) 193
Sulphur dioxide,
characterization of sulfur layers from reduced ——— on porous platinum black/teflon electrodes (Foral, Langer) 193
Sulphuric acid,
study of the platinum/electrolyte interface using surface plasmon excitation at stratified electrodes. Part II. Optical behaviour of Pt/——— and Pt/$H_2SO_4$ + $Cu^{2+}$ systems (Tadjeddine, Hadjadj) 43
Superoxide ion,
electrochemical investigation of the interaction between the ——— and cations of Group 2a in aqueous solutions (Argese et al.) 155
Surface plasmon excitation,
study of the platinum/electrolyte interface using ——— at stratified electrodes. Part II. Optical behaviour of Pt/$H_2SO_4$ and Pt/$H_2SO_4$ + $Cu^{2+}$ systems (Tadjeddine, Hadjadj) 43

Teflon,
characterization of sulfur layers from reduced sulfur dioxide on porous platinum black/——— electrodes (Foral, Langer) 193
Titanium dioxide,
electrochemical and FTIR spectroscopic characterization of ferrocyanide-modified ——— electrodes designed for efficient photosensitization (Desilvestro et al.) 411

Ultramicroelectrodes,
anodic stripping voltammetry at ——— for metal speciation studies in aqueous solutions of low ionic strength (Wang, Zadeii) 297

Vesicle systems,
voltammetric study of asymmetric viologens in an organic solvent, an aqueous solution and in ——— (Lu et al.) 337
Viologens,
voltammetric study of asymmetric ——— in an organic solvent, an aqueous solution and in vesicle systems (Lu et al.) 337

Water,
influence of ——— on the electroreduction

of 2-nitrophenylhydrazones in acetonitrile (Pazdera et al.) 399

Zeolite,
effects of solution pH on the voltammetric behaviour of ferrous/ferric ions at ———-modified electrodes (Iwakura et al.) 63

The ———-modified carbon paste electrode (El Murr et al.) 459

Zinc tetrakis(4-sulfonato-phenyl)porphine,
isoporphyrin formation upon electrochemical oxidation of ——— in aqueous solution (Su et al.) 363
